

# Quick Action<sup>®</sup>

The speed is in the seed

Grow a lawn that's  
ready to use – sooner

- Faster establishment
- Less maintenance
- Resistant to hard wear

# Enjoying your new lawn much sooner!

## Your fastest-ever lawn starts with Quick Action®

Why wait when you could be enjoying your new lawn so much sooner? You get more time to enjoy your lawn without having to spend extra time maintaining it.

With Quick Action®, your lawn gets off to a strong and early start, and continues throughout a longer growing season.

Quick Action® is the quick-getaway grass seed that starts growing even if your garden is still struggling with winter temperatures. The roots grow deeper and stronger, and the grass stays green for longer during summer droughts.

## Quick Action® gives you a greener lawn for less maintenance

- Ideal for sowing a new lawn or for repairing a patchy one
- Seeds readily start growing in soil temperatures as low as 3-5°C 
- Stays greener during summer droughts – deep, moisture-seeking roots need less watering and feeding 
- Stands up to the pounding of back-lawn sports sessions and dance parties
- Less maintenance and no more mowing than standard lawn grass
- A denser lawn with more grass means fewer weeds
